

ADVANTAGES OF THE LLN FOR STUDENTS

1) Partnership Network

The LLN is a partnership network including numerous local HE and FE colleges working to break down barriers to higher education and improve individuals' career prospects.

2) Recognised qualifications

The LLN offers vocational qualifications that are designed with leading employers and validated by Edge Hill University and the University of Liverpool – providing recognised qualifications.

3) Flexibility of delivery

Course provision is flexible in its delivery to suit students' needs. Most courses can be studied part-time and many are delivered across a number of sites in the region.

Courses really are for everybody. Age, background, employment status, previous qualifications are not automatically a barrier.

4) Funding

Course fees do apply, HOWEVER many employers are supporting individuals with funding for vocational qualifications that benefit both the employer and employee.

For those who do not have this support, fees are lower than traditional degrees and do not have to be paid until the course is complete – there is no initial outlay.

5) Career prospects

The LLN offers qualifications that will provide students with better career prospects and skills and knowledge recognised by their chosen profession.

6) Progression opportunities

The LLN provides every student with individual, appropriate and realistic progression opportunities, enabling you to reach the level you want.
